

ALIMENTO PARA PERSONAS EN
TRATAMIENTO DE HEMODIÁLISIS

SNACK HIPERPROTEICO

La tecnología tiene patente concedida en Chile

Autora principal: Marcela Vega
Facultad de Ciencias de la Salud

Snack saludable que aporta más nutrientes principalmente calorías y proteínas, que una galleta o queque tradicional.

Su consumo es ideal durante tratamientos prolongados, por su tolerancia y menor costo en relación a productos similares del mercado de alimentos protéicos.

Proporciona alto contenido proteico aportando las mismas cantidades de calorías disponibles en un suplemento tradicional, no se incorporan líquidos adicionales en su fabricación, posee mejor tolerancia y adherencia al consumo y por ende al tratamiento.

La tecnología alcanza un TRL 7.

FOOD FOR PEOPLE IN TREATMENT OF
HEMODIALYSIS

HYPERPROTEIC SNACK

The technology has a patent granted in
Chile

Main author: Marcela Vega
Faculty of Health Sciences

Healthy snack, which provides the same amount of nutrients, mainly calories and proteins, but its biscuit-type characteristic, gives it better tolerance and better adherence to its consumption and therefore to its treatment, in addition, the cost is significantly lower, being able to obtain many benefits in terms of quality of life and even survival.

High content in protein, providing the same number of calories available in a traditional supplement. It has better tolerance and adherence to consumption, and thus to treatment.

The technology is at TRL 7.
